RE: Water Quality Certification Order #11493 for U.S. Army Corps of Engineers
Public Notice #NWS-2013-245, P-1405 NAS Whidbey Fuel Pier Demolition and
Breakwater Installation Project, in Oak Harbor, Island County, Washington

Dear Commander O'Donnell:

On March 19, 2015, NAS Whidbey Island submitted a Joint Aquatic Resource Permit Application (JARPA) to the Department of Ecology (Ecology) for a Section 401 Water Quality Certification (401 Certification) under the federal Clean Water Act for the proposed P-1405 NAS Whidbey Fuel Pier Demolition and Breakwater Installation Project.

On behalf of the State of Washington, Ecology certifies that the work described in the JARPA and the public notice complies with applicable provisions of Sections 301, 302, 303, 306 and 307 of the Clean Water Act, as amended, and applicable state laws. This certification is subject to the conditions contained in the enclosed Order.

If you have any questions, please contact Rebekah Padgett at (425) 649-7129. The enclosed Order may be appealed by following the procedures described in the Order.

Sincerely,

Erik Stockdale, Section Manager
Shorelands and Environmental Assistance Program
Northwest Regional Office

**RE: Coastal Zone Consistency for U.S. Corps of Engineers #NWS-2013-245
P-1405 NAS Whidbey Fuel Pier Demolition and Breakwater Installation Project, in
Oak Harbor, Island County, Washington**

Dear Commander O'Donnell:

On March 18, 2015, NAS Whidbey Island submitted a Certification of Consistency with the Washington State Coastal Zone Management Program (CZMP). On May 14, 2015, Ecology and NAS Whidbey Island agreed to CZM extension until June 17, 2015. On June 15, 2015, Ecology and NAS Whidbey Island agreed to a second CZM extension until July 15, 2015. Pursuant to Section 307(c)(3) of the Coastal Zone Management Act of 1972 as amended, Ecology concurs with NAS Whidbey Island's determination that the proposed work is consistent with Washington's CZMP.

If you have any questions regarding Ecology's consistency determination please contact Rebekah Padgett at (425) 649-7129.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do all of the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form - by mail or in person. (See addresses below.) Email is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

TO: NAS Whidbey Island
 Attn: Commander Michael O'Donnell, Public Works Officer
 1115 W. Lexington Drive, Building 103
 Oak Harbor, WA 98278

On March 19, 2015, NAS Whidbey Island submitted a Joint Aquatic Resources Permit Application (JARPA) to the Department of Ecology (Ecology) for a Section 401 Water Quality Certification. A joint public notice regarding the request was distributed by the U.S. Army Corps of Engineers (Corps) for the above-referenced project pursuant to the provisions of Chapter 173-225 WAC on April 7, 2015.

The purpose of the proposal is to protect fuel transfer operations at the existing fuel pier during severe weather, improve access to the fuel pier, and reduce frequency of future maintenance dredging. The proposed work includes:

- Removal of an existing 26,800-square-foot pier and replacement with a 3,200-square-foot pile-supported breakwater. Removal of the 536-foot-long by 50-foot-wide finger pier breakwater would include removal of up to 970 creosote-treated piles. To support a 400-foot-long by eight-foot-wide batter and vertical pile-supported breakwater, a total of 87 24-inch-diameter concrete piles would be installed.
- Dredge a 3.9-acre channel, including removal of up to 38,500 cubic yards of sediment to a maximum dredge depth of 22 feet below mean lower low water plus two feet over dredge. Material would be disposed of at the nondispersive open-water disposal site in Port Gardner.
- Placement of 1,300 cubic yards of stone riprap armoring over a 2,800-square-foot area to protect the slope at the eastern edge of the mole.
- Replacement of six existing helical anchor buoys with six new helical anchor buoys.

The project is located on the Seaplane Base at Naval Air Station Whidbey Island, 150 Tulagi Avenue, Oak Harbor, Island County, Washington, Crescent Harbor, Section 1, T. 32 N., R. 1E., WRIA 6.

AUTHORITIES:

In exercising authority under 33 U.S.C. § 1341, RCW 90.48.120, and RCW 90.48.260, Ecology has examined this application pursuant to the following:

1. Conformance with applicable water quality-based, technology-based, and toxic or pretreatment effluent limitations as provided under 33 U.S.C. §§ 1311, 1312, 1313, 1316, and 1317 (FWPCA §§ 301, 302, 303, 306 and 307);
2. Conformance with the state water quality standards contained in Chapter 173-201A WAC and authorized by 33 U.S.C. § 1313 and by Chapter 90.48 RCW, and with other applicable state laws; and
3. Conformance with the provision of using all known, available, and reasonable methods to prevent and control pollution of state waters as required by RCW 90.48.010.

WATER QUALITY CERTIFICATION CONDITIONS:

Through issuance of this Order, Ecology certifies that it has reasonable assurance that the activity as proposed and conditioned will be conducted in a manner that will meet the applicable water quality standards and other appropriate requirements of state law. In view of the foregoing and in accordance with 33 U.S.C. § 1341, RCW 90.48.120, RCW 90.48.260 Chapter 173-200 WAC and Chapter 173-201A WAC, water quality certification is granted to the Applicant subject to the conditions within this Order.

Certification of this proposal does not authorize the Applicant to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water standards (Chapter 173-200 WAC), or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this certification shall absolve the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters, or sediments occurring as a result of project construction or operations.

A. General Conditions:

- A1. For purposes of this Order, the term "Applicant" shall mean NAS Whidbey Island and its agents, assignees and contractors.
- A2. For purposes of this Order, all submittals required by its conditions shall be sent to Ecology's Northwest Regional Office, Attn: 401/CZM Federal Project Manager, 3190 160th Avenue SE, Bellevue, WA 98008-5452. Any submittals shall reference Order #11493 and Corps Reference #NWS-2013-245.

- A3. Work authorized by this Order is limited to the work described in the following:
- JARPA received by Ecology on March 19, 2015;
 - Revised drawings received April 7, 2015 (dated March 2015);
 - Email from Michael Bianchi, NAS Whidbey Island, to Karen Urelius, Corps, dated March 26, 2015, RE: Emailing: NWS-2013-245-JPN.docx; and
 - Email from Michael Bianchi, NAS Whidbey Island, to Rebekah Padgett, Ecology, and Karen Urelius, Corps, dated March 30, 2015, RE: Emailing: NWS-2013-245-JPN.docx.

The Applicant will be out of compliance with this Order and must reapply with an updated application if the information contained in the JARPA is voided by subsequent changes to the project not authorized by this Order.

- A4. Within 30 days of receipt of an updated JARPA, Ecology will determine if the revised project requires a new water quality certification and public notice or if a modification to this Order is required.
- A5. This Order shall be rescinded if the U.S. Army Corps of Engineers does not issue an individual Section 404 permit.
- A6. The Applicant shall provide to Ecology's 401/CZM Federal Permit Manager a copy of the final Corps permit within two weeks of receipt of the permit. A copy shall be submitted per condition A2 above.
- A7. Copies of this Order shall be kept on the job site and readily available for reference by Ecology personnel, the construction superintendent, construction managers and lead workers, and state and local government inspectors.
- A8. The Applicant shall provide access to the project site and all mitigation sites upon request by Ecology personnel for site inspections, monitoring, necessary data collection, and/or to ensure that conditions of this Order are being met.
- A9. Nothing in this Order waives Ecology's authority to issue additional orders if Ecology determines that further actions are necessary to implement the water quality laws of the state. Further, Ecology retains continuing jurisdiction to make modifications hereto through supplemental order, if additional impacts due to project construction or operation are identified (*e.g.*, violations of water quality standards, downstream erosion, etc.), or if additional conditions are necessary to further protect water quality.
- A10. The Applicant shall ensure that all appropriate project engineers and contractors at the project site have read and understand relevant conditions of this Order and all permits, approvals, and documents referenced in this Order. The Applicant shall provide Ecology

a signed statement (see Attachment A for an example) from each project engineer and contractor that they have read and understand the conditions of this Order and the above-referenced permits, plans, documents, and approvals. These statements shall be provided to Ecology before construction begins at the project or mitigation sites.

- A11. This Order does not authorize direct, indirect, permanent, or temporary impacts to waters of the state (including wetlands) or related aquatic resources, except as specifically provided for in conditions of this Order.
- A12. Failure of any person or entity to comply with this Order may result in the issuance of civil penalties or other actions, whether administrative or judicial, to enforce its terms.

B. Water Quality Conditions:

- B1. This Order does not authorize temporary exceedances of water quality standards beyond the limits established in WAC 173-201A-210(1)(e)(i).
- B2. Ecology has reviewed the *Water Quality Protection and Monitoring Plan, Spec Section 01 57 19.01 20 Paragraph 1.10, Naval Air Station Whidbey Island, Whidbey Island, WA, P1405 Replace Fuel Pier Breakwater* (hereafter called the "Water Quality Monitoring Plan") prepared by Manson Construction Co., and dated May 20, 2015, and the Applicant shall submit a revised Water Quality Monitoring Plan that includes all changes and additions to the current Plan, as modified by this Order. The revised plan shall be submitted per Condition A2 on or before July 6, 2015. No work below OHWM may begin until Ecology approves the revised Plan.

The revised Water Quality Monitoring Plan shall, at a minimum, include the following information:

- a. Name and contact information of the person or firm responsible for monitoring;
- b. Map of sample locations including background, an early warning point, and point of compliance at or near the surface, midway, and bottom depths. For this project, the point of compliance is a 150-foot radius around the in-water activity;
- c. Monitoring frequency;
- d. Detection of exceedances: Water quality standards for turbidity in "Excellent" waters are as follows: turbidity shall not exceed 5 NTU over background conditions when the background is 50 NTU or less, or a 10 percent increase in turbidity when the background turbidity is more than 50 NTU. If exceedances of this standard at the point of compliance specified in WAC 173-201A-210(1)(e)(i)

is detected through water quality sampling and monitoring, the Applicant shall immediately take action to stop, contain, and prevent unauthorized discharges or otherwise stop the violation and correct the problem. After such an event, the Applicant shall assess the efficacy of the site BMPs and update or improve the BMPs used at the work site in an effort to reduce or prevent recurrence of the turbidity exceedance.

- e. Steps to be taken if monitoring results indicate an elevation at the early warning point, or if an exceedance has occurred. The amount of the exceedance and the reason for the exceedance shall also be reported;
 - f. Reporting: If no exceedances are detected, results of water quality sampling, as determined by the Plan, shall be forwarded to Ecology on a monthly basis in accordance to Condition A2; and
 - g. Notification of exceedances: Notification of exceedances that are detected through water quality sampling shall be made to Ecology within 24 hours of occurrence. Notification shall be made with reference to Order #11493, Attn: 401/CZM Federal Project Manager, by telephone at (425) 649-7129 or (425) 649-7000, or by fax to (425) 649-7098. The Applicant shall, at a minimum, provide Ecology with the following information:
 - i. A description of the nature and cause of exceedance.
 - ii. The period of non-compliance, including exact dates, duration, and times and/or the anticipated time when the Applicant will return to compliance.
 - iii. The steps taken, or to be taken, to reduce, eliminate, and prevent recurrence of the non-compliance.
 - iv. In addition, within five (5) days after notification of an exceedance, the Applicant shall submit a written report to Ecology that describes the nature of the exceedance, turbidity results and location, photographs, and any other pertinent information.
- B3. If further changes to the Water Quality Monitoring Plan are proposed through the duration of this Order, the Applicant shall submit them to Ecology for review and approval (see A2) prior to implementation. Following Ecology's approval, the Applicant shall comply with the approved, revised Water Quality Monitoring Plan.
- B4. If monitoring results demonstrate that the applicable water quality standards or project performance standards are not being met, Ecology may require additional monitoring and/or mitigation.

- B5. Visual monitoring for turbidity shall be conducted during all work below the OHWM.
- B6. Physical monitoring shall be conducted throughout the duration of dredging activity.
- B7. Background samples shall be collected outside the area of influence of the in-water work at the same frequency as the point of compliance samples.
- B8. During dredging and disposal activities, the Applicant shall ensure communication between the monitoring and dredging crews in order to allow for work slow down or stoppage in case of exceedances.

C. Conditions for Construction Activities:

- C1. All construction debris shall be properly disposed of on land so that it cannot enter a waterway or cause water quality degradation to state waters.
- C2. Machinery and equipment used during construction shall be serviced, fueled, and maintained upland, unless otherwise approved by Ecology, in order to prevent contamination to any surface water.
- C3. Wash water containing oils, grease, or other hazardous materials resulting from wash down of equipment or working areas shall be contained for proper disposal, and shall not be discharged into state waters or storm drains.
- C4. Work in or near the water that may affect fish migration, spawning, or rearing shall cease immediately upon a determination by Ecology that fisheries resources may be adversely affected.
- C5. A floating surface boom and debris barrier around the work area shall be deployed and maintained during the finger pier demolition in order to contain and collect debris.
- C6. Riprap shall be placed during lower tides and shall not be end-dumped.
- C7. The Applicant shall use tarps or other containment method when cutting or drilling over water to prevent debris, sawdust, and other materials from entering the water.
- C8. During construction, the Applicant shall have a boat available on site at all times to retrieve debris from the water.
- C9. All manmade debris that has been deposited below the OHWL within the construction work area shall be removed and disposed of upland such that it does not enter waters of

the state. Concrete rubble, metal debris, and other debris in the construction work corridor that have washed into marine areas shall be removed from the project area.

- C10. If cast in place, wet concrete/grout shall be prevented from entering waters of the state. Forms for any concrete/grout structure shall be constructed to prevent leaching of wet concrete/grout. Impervious materials shall be placed over any exposed concrete/grout not lined with the forms that will come in contact with state waters. Forms and impervious materials shall remain in place until the concrete/grout is cured.
- C11. Project activities shall be conducted to minimize siltation of the beach area and bed.
- C12. The Applicant shall operate the barge(s) and tug in deep water so as to minimize nearshore propeller wash impacts such as suspension of nearshore sediments.
- C13. Barges shall not be allowed to ground-out during construction.
- C14. The deployment of spuds, operation of equipment, and other activities shall not adversely affect eelgrass or kelp without prior approval by Ecology.
- C15. An advanced eelgrass survey shall be conducted per the *Eelgrass/Macroalgae Habitat Interim Survey Guidelines*, Washington Department of Fish and Wildlife, Revised June 2008. Three copies of the survey shall be submitted per A2 prior to start of construction.
- C16. If the results of the survey show that eelgrass or kelp impacts cannot be avoided, then an Eelgrass Mitigation Plan, to include monitoring, shall be prepared and submitted to Ecology for review and approval.

Piling Removal Conditions:

- C17. Approximately 970 creosote treated piles shall be removed from marine waters. Piling shall be completely removed by pulling from a crane. If piles break during removal and cannot be removed by crane, the piling shall be cut two feet at or below the mudline, and the hole capped with clean sand.
- C18. Piles, stubs, debris, and all associated excavated sediments shall be contained and prevented from entering waters of the state.
- C19. Piles removed from substrate: the pile shall be moved immediately from the water into the barge or onto uplands. The pile shall not be shaken, hosed-off, left hanging to drip, or any other action intended to clean or remove adhering material from the pile.
- C20. Work surface on the barge deck or on uplands shall include a containment basin for piles and any sediment removed during pulling of the piling. Basins may be constructed of

durable plastic sheeting with sidewalls supported by hay bales or support structure to contain all sediment.

- C21. The piles and any sediment removed during pulling of the piling shall be disposed of at an approved upland disposal site.

Pile Driving:

- C22. The 87 new piles shall be pre-cast concrete.

- C23. The concrete piles shall be installed primarily by means of an impact hammer.

D. Conditions for Dredging Activities:

- D1. A pre-dredge meeting is required to be convened two (2) weeks prior to the start of each dredging season, or as otherwise approved by Ecology, and the Applicant shall notify Ecology of this meeting per Condition A2.
- D2. All dredging shall be completed with a clamshell bucket. **Use of any other type of dredge will require preapproval from Ecology.**
- D3. Each pass of the clamshell dredge bucket shall be complete.
- D4. Dredged material shall be placed into the bottom dump scow.
- D5. Dredged materials shall be disposed of within the defined boundaries of the nondispersive open-water disposal site in Port Gardner. **Use of any other type of disposal method or location requires pre-approval by Ecology.**
- D6. All debris (larger than two feet in any dimension) shall be removed from the dredged sediment prior to disposal of material going to the open water disposal site. Similar sized debris found floating in the dredging or disposal area shall also be removed. This debris shall be disposed of upland such that it does not enter waters of the state.
- D7. Dredging operations shall be conducted in a manner that minimizes the disturbance or siltation of adjacent waters and prevents the accidental discharge of petroleum products, chemicals, or other toxic or deleterious substances into waters of the state.
- D8. Dredged material shall not be stockpiled on a temporary or permanent basis below the ordinary high water line.
- D9. During dredging, the Applicant shall have a boat available on site at all times to retrieve debris from the water.

- D10. Caution shall be used when placing material from the bucket into the scow to limit splash and prevent spillage.
- D11. The dredge operator shall pause the bucket at the surface, after its ascent through the water column, to minimize turbidity by allowing free water to drain from the bucket prior to swinging the bucket to the scow.
- D12. The Applicant shall implement the following plans, together hereafter called the "Dredging Plan," or as modified by this Order:
- a. *Dredging Plan Spec Section 35 20 23 Paragraph 1.3, Naval Air Station Whidbey Island, Whidbey Island, WA, P1405 Replace Fuel Pier Breakwater*, prepared by Manson Construction Co., and dated May 27, 2015; and
 - b. *Dredging Quality Control Plan Spec Section 01 57 19.01 20 Paragraph 1.9, Naval Air Station Whidbey Island, Whidbey Island, P1405 Replace Fuel Pier Breakwater*, prepared by Manson Construction Co., dated June 24, 2015, or as modified by this Order.
- D13. Disposal barges shall be inspected for leakage prior to use. Any leakage resulting in a visible plume shall trigger repairs of the disposal barge.
- D14. Prior to each dredging cycle, the Applicant shall contact the Dredged Material Management Program (DMMP) agencies to determine whether additional sediment testing is required. If additional testing is required, no dredging or disposal shall be conducted until the material has been tested and a suitability determination has been issued. This area ranks moderate in potential for contamination and the recency determination extends until February 2017. Contact the Dredged Material Management Office for a possible extension.

E. Emergency/Contingency Measures:

- E1. The Applicant shall develop and implement a Spill Prevention and Containment Plan for all aspects of this project, including removal of the fuel tank from the substrate.
- E2. The Applicant shall have adequate and appropriate spill response materials on hand to respond to emergency release of petroleum products or any other material into waters of the state.

- E3. Fuel hoses, oil drums, oil or fuel transfer valves and fittings, etc., shall be checked regularly for drips or leaks, and shall be maintained and stored properly to prevent spills into state waters.
- E4. Any work that is out of compliance with the provisions of this Order, or conditions causing distressed or dying fish, or any discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, is prohibited. If these occur, the Applicant shall immediately take the following actions:
- a. Cease operations at the location of the violation or spill.
 - b. Assess the cause of the water quality problem and take appropriate measures to correct the problem and/or prevent further environmental damage.
 - c. Notify Ecology of the failure to comply. All oil spills shall be reported immediately to Ecology's 24-Hour Spill Response Team at 1-800-258-5990, **and** within 24 hours of spills or other events to Ecology's 401/CZM Federal Project Manager at (425) 649-7129 or (425) 649-7000.
 - d. Submit a detailed written report to Ecology within five (5) days that describes the nature of the event, corrective action taken and/or planned, steps to be taken to prevent a recurrence, results of any samples taken, and any other pertinent information.

Compliance with this condition does not relieve the Applicant from responsibility to maintain continuous compliance with the terms and conditions of this Order or the resulting liability from failure to comply.

F. Timing Conditions

- F1. This Order expires three (3) years from the date of issuance of the Corps permit.
- F2. Work below the Ordinary High Water Line (OHWL) shall not occur from February 16 through July 14 of any year for the protection of fish.

G. Reporting and Notification Requirement Conditions

- G1. Applicant shall provide notice to Ecology's 401/CZM Federal Project Manager:
- At least three (3) days prior to the start of construction and
 - Within 14 days after completion of construction at the project site.

Notification referencing Corps Reference #NWS-2013-245, Order #11493 can take place by telephone to (425) 649-7129 or (425) 649-7000, fax to (425) 649-7098, or in writing.

- G2. If the project construction is not completed within 13 months of issuance of this Order, the Applicant shall submit per Condition A2 a written construction status report and submit status reports every 12 months until construction is complete.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do both of the following within 30 days of the date of receipt of this Order:

File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.

Serve a copy of your appeal and this Order on Ecology in paper form - by mail or in person. (See addresses below.) Email is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
